Technical Skills

Javascript, ReactJS, Firebase, Material UI, HTML5, CSS3, Tailwind CSS, Git,
Responsive Design, Cross-Browser Compatibility, Web APIs, Performance Optimization, npm, yarn, Vite

Projects

My Progress Tracker, *ReactJS, Firebase, Material UI, ChartJS, Axios* 🔗
- Integrated Firebase authentication for Google login in the web app.
- Utilized Axios to seamlessly integrate multiple APIs for easy searching of books, movies, and series.
- Implemented CRUD functionality with Firebase Realtime Database for efficient data management.
- Designed an attractive user interface to display user progress.
- Managed edge cases related to login, logout, and API calls for a smooth user experience.

Recipe App, *ReactJS, React Router V6, Fetch API, React Spinner, HTML5, CSS3* 🔗
A Recipe web app with smooth interface where a user can:
- Enter name of any dish and all the varieties of it will be shown in UI.
- Select any specific recipe and get complete details of it.
- Save various recipes and access them at a single place.
- Uses react router to navigate across the web app
- Uses Fetch API to access large library of recipe and handles all edge cases

Note Keeping, *ReactJS, localStorage, HTML5, CSS3* 🔗
- Follows CRUD principle where user can create, update & delete a note
- Has search functionality to search for a specific note
- Uses localStorage to store task & it's state in order to protect it from being lost in case tab/browser is closed or refreshed

To-do App, *ReactJs, localStorage, HTML5, CSS3* 🔗
- Designed a sleek and responsive user interface for a task management web app.
- Implemented the CRUD principle, allowing users to create, update, and delete tasks.
- Utilized localStorage to store task data and its state, ensuring data persistence even if the tab or browser is closed or refreshed.

Education

B.Tech Computer Science & Engineering,   2022 – ongoing
Amity University
